

## Drupal 8 development internship

MD Systems is a leading Software and ICT services company in Zurich which concentrates on open source software and the content management framework (CMF) Drupal. MD Systems is active in the Swiss Drupal community and regularly organizes events and community evenings.

In line with these activities, MD Systems has created four positions for skilled and curious people to jumpstart their Drupal career and become expert developers. Join our team and build the next generation open source web platform Drupal 8 with us. Instead of you paying to receive highly specialized training, MD Systems will give you the opportunity to participate in our expert-level training for free. You will even get paid for developing GPL open source software!

We expect you to be highly motivated and bring existing know-how about modern programming and the "open source" world with you. An engagement of at least 60% is necessary.

### Our Proposal

- Minimum time frame: six months (this can be extended if both parties are interested)
- Payment: CHF 2'000.- per month (for a full time engagement)
- Free of charge top-level education in Drupal 8 open source development
- Develop widely used components for the upcoming top edge CMF Drupal 8
- Learn from experts about the next generation in web technology
- Get a public track record as a contributor and join the community
- Start: immediately or upon agreement

This is the best possible preparation and reference for any future job in this field.

### What you bring...

- You have experience in modern web development and you are fluid in a programming language (preferably PHP).
- You are passionate about development, have developed code before, and you are able to proof this with code and projects and you know your way around development tools. Please note that plain education level programming is not enough.
- You are studying, or have studied, something relevant (Computer Science, etc...) at a University or Institution of Higher Learning.
- You have the will to learn about open source software development in detail
- You are fluent in english and like teamwork, cooperation and challenges
- You are very motivated, have a keen eye for detail and have a healthy sense of humor

### Signup / Apply

Please use the form on <http://www.md-systems.ch/en/jobs/apply> or contact IAESTE, to apply for this "get paid while you learn" one-of-a-kind training program in Switzerland.

For a select few there will always be an option to join the MD Systems team permanently.
